

The end of chasing.

A simple payment tracker for freelance tutors, coaches, instructors — and everyone who teaches for a living.

- Know who has paid — in one glance
- Remind politely — in one tap
- Keep teaching — that's your job, not chasing

Built by @careershifttechguy · ShiftedTech

Thank you for taking the survey — this is what you helped shape.

You know this feeling.

It's the 5th of the month. Three students haven't paid. One parent "forgot" again. You open the chat, type a reminder, delete it, retype it softer, add an emoji so it doesn't sound rude — and still feel paiseh pressing send.

Meanwhile the money you already earned sits in someone else's pocket, and the tracking lives in your head, a notebook, or twenty scrolls of your bank app.

You didn't become a teacher for this. Every hour spent chasing is an hour not spent on lessons, family, or rest — and every forgotten fee is income you worked for and never collected.

**The problem isn't you. It's that nobody built a tool
for how tutors and coaches actually work.**

So I built RemindClient.

Three steps. No manual. No training needed.

1 List your students once

Name, fee, and which day of the month it's due. Two minutes, done forever.

2 See everything in one glance

One dashboard: who's paid, who's due, who's overdue — and your month's total collected vs outstanding.

3 Remind without the awkwardness

One tap opens a polite, pre-written reminder with your PayNow details — ready to send. Upgrade later and reminders send themselves. You never chase again.

Works on any phone — nothing to install. Your data stays private and locked to your account only.

A glimpse of your dashboard.

October 2026		Collected S\$720 / S\$1,200	
STUDENT	DUE / NEXT LESSON	STATUS	ACTION
Aisyah	Due 5 Oct · Sat 10am	Paid	—
Marcus	Due 5 Oct · Tue 4pm	Overdue	Remind
Priya	Due 7 Oct · Wed 6pm	Due	Remind
Danish	Due 10 Oct · Sun 9am	Paid	—
Wei Ling	Due 12 Oct · Fri 5pm	Due	Remind

Every student, every fee, every lesson — one glance. Green means paid. Red means tap the button.

So what happens when you tap Remind? Next page →

How the reminders reach them.

1 · WhatsApp — one tap, from YOUR number

You → Mrs Tan (Marcus's mum)

Hi Mrs Tan! Gentle reminder from Coach (You)

Marcus's Oct fee (S\$240) is due Sat, 5 Oct.

PayNow (You): 9123 4567 · Next lesson: Tue 4pm

You tap Remind → this message opens in your own WhatsApp, already written → you press send. One tap per student. Included from day one, free.

2 · Telegram — fully automatic, zero taps

R RemindClient · bot · sent automatically

Hi Mrs Tan! Gentle reminder from Coach (You)

Marcus's Oct fee (S\$240) is due Sat, 5 Oct.

PayNow (You): 9123 4567 · Next lesson: Tue 4pm

Parent taps Start once (you share a link when they join). After that, reminders send themselves on schedule — from the RemindClient bot, never from your number or theirs. You do nothing at all.

Same polite message either way — use both, mix per family. WhatsApp full-auto is on the roadmap.

Honest pricing. And your reward.

Monthly

S\$10

per month · cancel anytime

BEST VALUE

Annual

S\$60

per year — half price

If RemindClient recovers just ONE forgotten fee, it has already paid for itself.

YOU READ TO THE END — YOUR 3-MONTHS-FREE CODE

TEACH3

Enter it when you sign up — I'll email you the moment it's ready.

One more thing — I read every reply personally.

Thought of a “yes, but what about...”? Reply to my email — it might shape the app.
